Start with the future in mind

KPMG Powered Enterprise is your direct route to outcome-driven functional transformation. By starting with the model answer you can accelerate your transformation journey, ensure you get the most out of the latest technology and build the capability to continually improve and adapt. Powered Enterprise is built on KPMG’s deep functional expertise and includes KPMG’s Target Operating Model, Powered Technology and Powered Evolution.

The goal — make your businesses more responsive, resilient, and competitive — ultimately, bringing the future within reach. Today.

Components of Powered Enterprise

KPMG Target Operating Model

A holistic design of how your business works, the Target Operating Model includes six design layers and locks in KPMG’s knowledge of functional and industry best practice.

KPMG Powered Technology

Leading SaaS platforms pre-configured to reflect leading practice, are enhanced with pre-built digital assets that incorporate AI and advanced automation.

KPMG Powered Evolution

Managed services help drive continuous improvement and realise the full value from the latest leading practices and technology innovations.

96% of C-suite leaders are **prioritising technology investment** in the next 18 months.*

“KPMG was the perfect fit for us, bringing the tools, technology and experience necessary for us to meet the future demands of our business.”

— **Construction industry client**

A model answer to achieve the results that matter

For functional transformation, an efficient target operating model should extend beyond the traditional people-process-technology layers. The KPMG Target Operating Model includes six design layers:

Governance

The risks, controls and security segregation requirements related to processes. Policies that help govern the processes and technologies.

Functional process

The leading practices, process taxonomies, process flows and maturity models that describe functional operation. The backbone of the Target Operating Model to which everything else relates.

Performance insights and data

The data and analytics to inform decision making and support business performance with the related master data structures to enable these.

People

The roles, organisational relationships, competencies and skill requirements needed to execute all process areas. This layer intersects with Functional Process to describe who does what.

Technology

Describes which technologies support what parts of each process, and how the technology applications are integrated.

Service delivery model

The model that defines where and by whom processes should be performed. It also describes incremental components required to run and operate a capability center.

KPMG Powered Enterprise

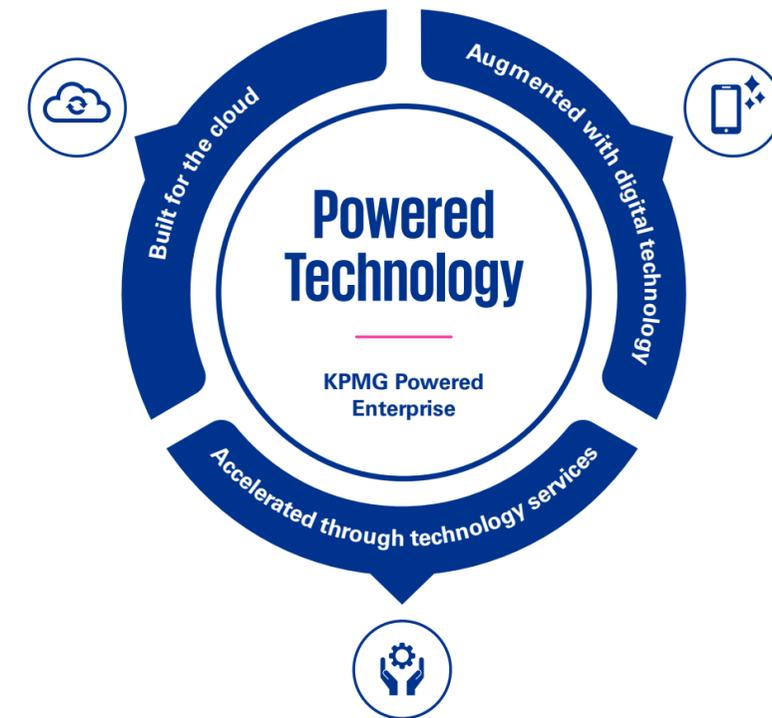

Outcome-driven functional transformation

Implementing the right technology

Powered Technology helps you realise efficient time-to-value because you start with a pre-built solution that is configured on leading cloud platforms.

KPMG leverages a shared portfolio of digital use cases that demonstrate how to enhance specific process areas. Added to this is a range of pre-built digital technology solutions and broad-ranging technology services. Together, the Powered Technology suite can help to provide a smooth transition to faster, smarter ways of working.

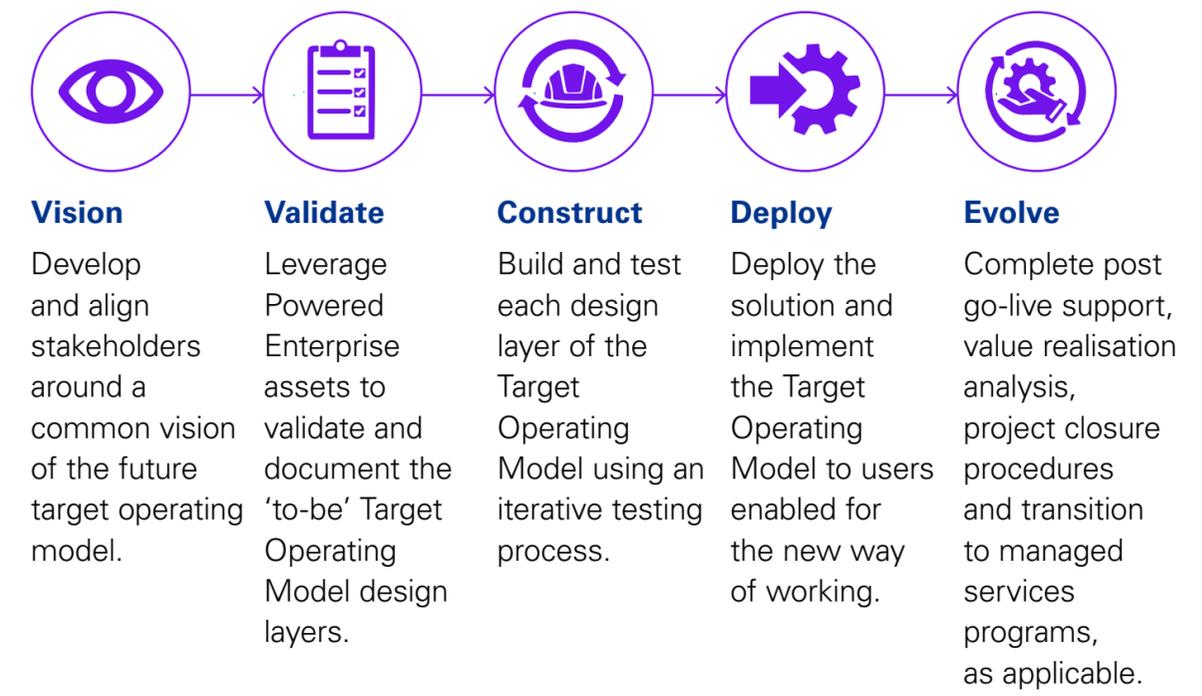

KPMG Powered Evolution — designed to help enhance your business

A key advantage of Powered Enterprise is Powered Evolution — an evergreen release cycle that keeps you current with KPMG’s leading practice and latest Operating Model, together with the latest updates from your cloud provider. Powered Evolution’s innovation goes beyond just technology updates:

Delivering results, collaboratively

KPMG professionals use KPMG’s iterative delivery methodology and tooling. Underpinning this methodology is the Powered Execution Suite, which helps ensure consistent delivery across three key areas: program management, value management and change management.

Powered Enterprise is designed to help you:

1. Transform the way you run your business.
2. Help your people adopt and embrace change.
3. Build agile functions that evolve as you grow.
4. Exploit new technologies for value and performance.
5. Drive future success with ongoing value through managed services.
6. Optimise service delivery and use of data for competitive advantage.

KPMG Powered Enterprise

Outcome-driven functional transformation

Put Powered Enterprise to work

Powered Enterprise is not just about migrating finance, HR, IT or supply chain management to the cloud. It's about leveraging Powered's pre-built digital assets to transform the way you run your business and unleashing new levels of agility, insight, efficiency and performance. The value is multiplied as you repeat that success across your business.

Achieve better outcomes across every business function:
