

Employee Share Scheme Reporter

The management of Employee Share Schemes (ESS) can be incredibly complex. The burden on in-house resources continues to rise with regular legislative change, a more globally mobile workforce and the increasing importance placed on employer reporting by the ATO.

ESS Reporter is an industry-leading solution that automates the complex calculation of ESS income, sourcing data direct from share plan administrators, to:

- minimise the time required of in-house teams
- reduce the risk of error
- provide the assurance of KPMG Tax sign-off on employee and ATO reporting
- generate reports that provide clarity to employees regarding their tax obligations.

For FY19 reporting, ESS Reporter automated the analysis of over **28,000 ESS transactions** with a combined **value in excess of \$500M.**

Key benefits

Complete automation of the calculation of reportable income

Caters to internationally mobile participants

Manages employee communication

Calculates relevant payroll tax

Cash incentive arrangements

Flexible to your needs
