Corporate Tax Rates 2

Substantively Enacted¹ Income Tax Rates for Income Earned by a CCPC² for 2019 and Beyond—As at June 30, 2019

Notes

- (1) For Accounting Standards for Private Enterprise (ASPE) and International Financial Reporting Standards (IFRS) purposes, a corporation's recorded income tax liabilities and assets in their financial statements should be measured using tax rates that are considered to be "substantively enacted" at the balance sheet date. In general, where there is a majority government, federal and provincial tax changes are considered to be "substantively enacted" for ASPE and IFRS purposes when a tax bill containing the detailed legislation is tabled for first reading in the House of Commons or the provincial legislature. In the case of a minority government, however, the "substantively enacted" test is more stringent and requires the enabling legislation to have passed third reading in the House of Commons or the provincial legislature.

For U.S. Generally Accepted Accounting Principles (U.S. GAAP) purposes, a corporation's recorded income tax liabilities and assets in their financial statements should be measured using tax rates that are considered to be enacted at the balance sheet date. In general, tax rate changes are considered enacted once the relevant bill has received Royal Assent.

When tax rate changes are considered enacted or "substantively enacted", the effect of the change in tax rate is reflected in the period in which the changes are enacted or "substantively enacted". The effect of the change is recorded in income as a component of deferred tax expense in the period that includes the date of enactment or substantive enactment. For example, if a bill becomes "substantively enacted" for ASPE or IFRS purposes (enacted for U.S. GAAP purposes) on December 31, the tax rate changes should be reflected in the corporation's financial statements for the quarter that includes December 31.

- (2) The federal and provincial tax rates shown in the tables apply to income earned by a Canadian-controlled private corporation (CCPC). In general, a corporation is a CCPC if the corporation is a private corporation and a Canadian corporation, provided it is not controlled by one or more non-resident persons, by a public corporation, by a corporation with a class of shares listed on a designated stock exchange, or by any combination of these, and provided it does not have a class of shares listed on a designated stock exchange.
- (3) The general corporate tax rate applies to active business income earned in excess of the small business income threshold. See the table "Small Business Income Thresholds for 2019 and Beyond" for the federal and provincial small business income thresholds.
- (4) Corporations that derive at least 10% of their gross revenue for the year from manufacturing or processing goods in Canada for sale or lease can claim the manufacturing and processing (M&P) deduction against their M&P income.
- (5) The federal and provincial tax rates shown in this table apply to investment income earned by a CCPC other than capital gains and dividends received from Canadian corporations. The rates that apply to capital gains are one-half of the rates shown in the table. Dividends received from Canadian corporations are generally deductible in computing regular Part I tax, but may be subject to Part IV tax, calculated at a rate of 38 1/3%.
- (6) The federal government decreased the small business income tax rate to 9% (from 10%) effective January 1, 2019.

Corporate Tax Rates 3

Substantively Enacted¹ Income Tax Rates for Income Earned by a CCPC² for 2019 and Beyond—As at June 30, 2019

- (7) A general tax rate reduction is available on qualifying income. Income that is eligible for other reductions or credits, such as small business income, M&P income and investment income subject to the refundable provisions, is not eligible for this rate reduction.

Income of a corporation earned from a personal services business is not eligible for the general rate reduction and is subject to an additional 5% tax, which increases the federal tax rate on personal services business income to 33%.

- (8) Alberta's general corporate income tax rate for active business, investment and M&P income will decrease to 11% (from 12%) effective July 1, 2019. The corporate tax rate will further decrease to 10% on January 1, 2020, 9% on January 1, 2021 and 8% on January 1, 2022. These rate reductions were included in Alberta Bill 3, which was tabled on May 28, 2019.
- (9) Manitoba increased the province's small business income threshold to \$500,000 (from \$450,000) effective January 1, 2019.
- (10) Quebec decreased the small business income tax rates to 6% (from 7%) effective January 1, 2019. The rate will further decrease to 5% in 2020 and 4% in 2021. The rate reductions will be effective January 1 of each year.

Quebec's small business deduction is generally available to corporations only if their employees were paid for at least 5,500 hours in the taxation year (proportionally reduced for short taxation years) or if their employees and those of their associated corporations were paid for at least 5,500 hours in the previous taxation year, to a maximum of 40 hours a week per employee (excluding the hours paid to a subcontractor). The small business deduction is reduced linearly between 5,500 and 5,000 hours, and falls to zero at 5,000 hours.

Small and medium-sized businesses in the primary (i.e., agriculture, forestry, fishing, hunting, mining, quarrying and, oil and gas extraction) and manufacturing sectors in Quebec may be able to claim an additional deduction of up to 4% if the proportion of primary and manufacturing sector activities of the corporation for the taxation year is 50% or more, regardless of the number of hours paid. The additional deduction is available at a lower rate if the proportion of such activities for a particular taxation year is between 25% and 50%. In the event the number of hours paid exceeds 5,500 hours and the proportion of activities is between 25% and 50%, the corporation in the primary and manufacturing sector will be eligible for the regular small business deduction and a portion of the additional deduction. The province reduced the rate of this additional deduction beginning on March 28, 2018 and further reduced the rate to 2% (from 3%) effective January 1, 2019. This additional deduction will be gradually reduced until it is eliminated. The rate will decrease to 1% in 2020 and nil in 2021. The rate reductions will be effective January 1 of each year.

Quebec's general corporate income tax rate for active business, investment, and M&P income decreased to 11.6% (from 11.7%) in 2019 and will further decrease to 11.5% in 2020. The rate reductions are effective January 1 of each year.

- (11) Prince Edward Island decreased the province's small business tax rate to 3.5% (from 4%) effective January 1, 2019. Prince Edward Island's 2019 Budget proposed a further reduction in the province's small business income tax rate to 3% (from 3.5%) effective January 1, 2020. However, this rate is not considered substantively enacted or enacted as of June 30, 2019 as the reduction has not been tabled in a bill as of June 30, 2019.

The information contained herein is of a general nature and is not intended to address the circumstances of any particular individual or entity.
