Corporate Tax Rates 2

Federal and Provincial/Territorial Tax Rates for Income Earned by a General Corporation—2020 and 2021¹

Notes

- (1) The federal and provincial/territorial tax rates shown in the tables apply to income earned by corporations other than Canadian-controlled private corporations (CCPCs). A general corporation typically includes public companies and their subsidiaries that are resident in Canada, and Canadian-resident private companies that are controlled by non-residents.

For tax rates applicable to CCPCs, see the tables “Federal and Provincial/Territorial Tax Rates for Income Earned by a CCPC”.

- (2) The federal and provincial/territorial tax rates shown in the tables apply to investment income earned by general corporations other than capital gains and dividends received from Canadian corporations. The rates that apply to capital gains are one-half of the rates shown in the tables. Dividends received from Canadian corporations are deductible in computing regular Part I tax, but may be subject to Part IV tax, calculated at a rate of 38 1/3%.
- (3) Corporations that derive at least 10% of their gross revenue for the year from manufacturing or processing goods in Canada for sale or lease can claim the manufacturing and processing (M&P) deduction against their M&P income.
- (4) A general tax rate reduction is available on qualifying income. Income that is eligible for other reductions or credits, such as small business income and M&P income, is not eligible for this rate reduction.
- Income of a corporation earned from a personal services business is not eligible for the general rate reduction and is subject to an additional 5% tax, which increases the federal tax rate on personal services business income to 33%.
- (5) Alberta’s general corporate income tax rate for active business, investment and M&P income decreased to 10% (from 11%) effective January 1, 2020. The province further reduced its general corporate income tax rate to 8% (from 10%) effective July 1, 2020.
