Dear Sir / Madam,

We present to you the forty-sixth edition of our Software Licensing Bulletin, which highlights IBM WebSphere Application Server (WAS)® licensing details.

- WebSphere Application Server is a web application server from IBM. It provides java® based runtime environments to develop and run applications.
- There are three offerings from lightweight production environments to enterprise-class development and deployment - WebSphere Application Server Liberty Core, WebSphere Application Server, WebSphere Application Server Network Deployment.
- License metrics for IBM WebSphere Application Server: Limited Use Socket, Processor Value Unit.
- A number of products come bundled with IBM WebSphere Application Server – IBM DB2 Advanced Workgroup Server, IBM DB2 Enterprise Server, IBM Tivoli Access Manager to name a few.
- The bundled DB2 should be used by principal program only and in same quantity as the principal program.
- Use for development and unit testing purpose – Software can be used on a developer machine by a developer only for development and unit test purposes. Software and its component cannot be used for any production purposes.

We hope the bulletin was informative. We would be happy to arrange for any additional information that you may require on the subject. Please write to us at in-fmkpmgccsbulletin@kpmg.com, for any queries or feedback.

Regards,
