Dear Sir/Madam,

We present to you the next edition of our Software Licensing Bulletin, which highlights information on Veritas Netbackup.

- **NetBackup** uses a common license system same as the other Veritas® products. However, the common license system provides flexibility in the license features that each product implements. For example, NetBackup does not have a node-locked license system, but some other products do.

- **The media/disk kit** by itself does not allow any access to NetBackup. You always need a license key (either permanent or evaluation). License keys should always be delivered with the media/disk kit, so you should never find yourself with a media/disk kit and no key.

- **Information about license keys** is stored on the master server. To access the information, open the NetBackup Administration Console and select Help > License Keys. On media servers, enter the master server name as the host name on the login screen.

- When you install NetBackup, you are prompted to enter the license keys for all options and agents. If you purchase an agent or other add-on product at a later date, you can enter its license key manually. Many options and agents require that you have your original NetBackup DVDs, because additional binaries must be installed. You should always keep your NetBackup DVDs in a safe place.

We hope the bulletin was informative. We would be happy to arrange for any additional information that you may require on the subject. Please write to us at in-fmkpmgccsbulletin@kpmg.com, for any queries or feedback.

Regards,
KPMG in India
