Dear Sir/Madam,

We present to you the next edition of our Software Licensing Bulletin, which highlights important features of Flexera FlexNet Manager®.

**Flexera FlexNet Manager**

- **FlexNet Manager Suite** is available through three delivery models:
  1. On-premises
  2. Cloud (Software as a Service (SaaS) solution)
  3. Managed service.

- It is a scalable IBM® license compliance and software license enhancement solution that is built on the FlexNet Manager Platform. The product automates and helps enhance entitlement based software license management to enable the reduction of license, maintenance and audit costs for IBM server software, while maintaining license compliance.

- **FlexNet Manager Suite optimization products** have a Product Use Rights Library that contains-licensing entitlements for key vendors, including Adobe®, IBM®, Microsoft®, Oracle®, SAP®, Symantec™ and VMware—to minimize license consumption and allow organizations to achieve optimization.

- **The FlexNet normalized inventory products** provide:
  - Baseline tracking of devices: Identify changes of each device over time; devices missing or changed are flagged. (Supports IMAC processes—installs, moves, adds and changes)
  - Easy integration with service desk and other tools through web services. This is particularly important to keep the repository up to date during IMAC processes.

We hope the bulletin was informative. We would be happy to arrange for any additional information that you may require on the subject. Please write to us at in-fmkpmgccsbulletin@kpmg.com, for any queries or feedback.

Regards,

KPMG in India
