Cyber Security
An enterprise-wide risk

Cyber security has emerged as a key enterprise-wide risk for organisations. The nature of cyber-attacks has been constantly evolving and the corresponding risk results in significant exposure for enterprises in various proportions.

Coupled with the digital transformation journey, this has resulted in cyber risk moving to the front end of the business. As businesses expose themselves to evolving technology and digital ecosystems, they need to ensure that their cyber risk exposure is effectively managed.

Cyberattacks in the current era have become more specialised and concentrated, targeting specific organisations and individuals. The impact due to incidents has resulted in significant damage, spanning from financial losses, disruption of operational services to erosion of shareholder value and trust.

There is a pressing need to understand this threat comprehensively and address it holistically.

Our value proposition:
- Cyber services portfolio
- Addressing C-suite boardroom questions
- Our tools and resources
- Cyber - Centre of Excellence
- Access to expertise and professionals across geographies.

Cyber philosophy

KPMG in India is focused on providing holistic services to our clients to help them navigate through the ever-changing cyber risk landscape. Through constant innovation and deep knowledge, we provide our clients with service offerings that help them mitigate cyber risk while enabling them to pursue business opportunities. We are a part of a global network and have access to expertise and professionals across geographies.

- Cyber drills and red/ blue teaming.

**Cyber response**

Effective and efficient response to cyber incidents

- Forensic analysis and detailed investigations
- Incident response readiness and planning (Simulation, Tabletop exercises, Playbooks, Training and Awareness)
- Cyber incident investigations and remediation (Retainership, On-call services)
- Threat intelligence collection
- Data breach remediation.

Digital cyber security – Cloud | Mobile | Internet of things | Intelligent automation | Blockchain

high value managed services
We position cyber security as a priority on board room agendas and help ensure that the right perspectives are established across stakeholders.

We help answer the right questions for key executives to ensure that cyber security risks are completely understood and the right strategy is put in place.

C suite – boardroom questions

- What is the state of my current cyber programme at a holistic level?
- How can I be sure that we have a comprehensive security strategy?
- Is our cyber programme struggling to demonstrate the value it provides?
- Is my organisation evaluating the use of new cyber security solutions?
- Do I feel that our team is struggling to unlock the value from existing cyber investments in tools and technology?
- Is it more difficult to locate information because of disorganisation?
- As an organisation are we effectively utilising resources for organisational security?
- How do I get the comfort of having all my financial data secure and not compromised in terms of integrity?
- How comfortable am I with our third party risk management programme?
- How do I assess and manage all the regulatory risks and compliance levels?
- Am I aware of the digital technologies in the new age and its risks?
Our tools and resources

**Digital insights platform**
A platform that continuously monitors upcoming threats arising from cyber and digital and provides real time actionable insights

- Web analysis
- Dark web scanning
- Threat intelligence
- Deal advisory due diligence
- Third party risk management
- Brand infringement
- Digital reputation
- Social imposters.

**Cyber KARE**
- Mobile-based application
- Enables an enterprise to perform a self-assessment of its cyber security in a repeatable and measurable manner
- Designed to help senior management and CXOs to gain a quantitative view of their organisation’s potential exposure to cyber threats and associated risks in an executive dashboard covering security and privacy.

**Third party risk management (TPRM)**
- KPMG in India has developed a specific solution called TPRM to assess vendor risk
- Our value proposition:
  - 250+ assessments / year
  - Key geographical regulatory requirements
  - Hub and spoke model
  - Seasoned resources with service industry experience.

**Our tools and resources**
Cyber - Centre of excellence

**Cyber lab**
- Progressive security-testing lab across two locations
- ISO 27001 certified facility
- Network, bandwidth physically segregated from corporate network
- Physical access control restrictions.

**Cyber enablement centre**
- State of the art 24/7 centres with live cyber feeds
- Monitoring global cyber threats on a continuous basis
- Cloud-based technologies for managing security
- Physical access control restrictions.

**Cyber forensics**
- Modern cyber forensic labs across two locations
- The laboratories are fully equipped with advanced forensics investigation tools and resources
- Network, bandwidth physically segregated from the corporate network
- Physical access control restrictions.
