

KPMG East Africa's Mining Forum

Dear

Welcome to KPMG East Africa's Mining Forum.

This forum is designed to provide regular updates on matters related to the Mining Sector. At KPMG, we are committed to proactively understanding changes in legislation, global and local business trends and their impact on mining businesses in East Africa.

With Kenya inching closer to finalizing its Mining Regulations, Uganda considering its mining policy together with the Extractive Industries Transparency Initiative (EITI) membership initiative and East Africa Metals finalising its deal with the Tibet Huayu Mining Company on the mining of precious metals in Ethiopia, Mining is clearly making its mark in East Africa.

To kick us off, The draft Mining Regulations in Kenya seek to convert artisanal mining permits into mining permits. We anticipate this is to formalize the mining value chain for greater regulatory oversight.

We set out a link to the draft Regulations and would welcome any comments or proposals in this respect.
