Exciting career opportunity

Job Title	Manager/Senior Manager
Job Function	Advisory
Location	Kenya

Job Description

Demand for infrastructure is rising with the accelerating pace of globalization and urbanization. The infrastructure gap in Africa constrains economic growth and leaves the most vulnerable without access to basic services. Increased infrastructure investment in Africa can create large-scale opportunity, both financial and non-financial (environmental, social and governance) and underpin African's achievement of the Sustainable Development Goals. KPMG's East Africa Infrastructure Advisory team is committed to supporting the delivery of high quality and affordable infrastructure on the continent and delivering on the Sustainable Development Goals.

KPMG's East Africa Infrastructure Advisory team is therefore seeking a manager level individual(s) with 8-10 years of experience assessing, planning, and implementing major capital projects. This individual(s) will work with a multi-disciplinary team of KPMG professionals with project finance, procurement, accounting and consulting backgrounds.

Our infrastructure team adds value to our clients on their major infrastructure projects by helping them understand and manage risks associated with their projects. Our advisory assistance helps both public sector and private sector clients develop strategies to implement, fund and manage their major infrastructure projects through effective planning, transaction structuring, robust value for money analysis, and effective procurement and implementation. For private sector clients, we assist them in a myriad of infrastructure related advisory services including responding to alternative delivery opportunities through proposal assistance, managing funding competitions and providing key capital markets advice.

Position Summary

This role is geared for those with in-depth experience in infrastructure transaction advisory from business case development and feasibility studies, through transaction procurement and financing.

This individual will be part of the management team leading our practice in the delivery of high quality services to top tier public and private sector clients in our practice by bringing his/her advisory expertise to the team. He/she will be responsible for assisting with business development across the region and advising major capital projects across transport, mining, power and utilities, oil and gas and social infrastructure.

Role and Responsibilities

This individual will assist partners/directors as well as take the lead on advising clients in the following areas:

- Provide leadership, direction, and guidance to senior associate and associate team members
- Develop and present client materials including status reports, project reports and presentations
- Monitor budgets, schedules, work quality, scope and client deliverables
- Contribute to hands-on delivery of core analysis responsibilities including primary and secondary research, quantitative data collection and analysis, financial modeling, business analysis, and application of methodologies to achieve client objectives

Provide project strategy and development analysis in some or all of the following areas:

- Infrastructure planning and strategy
- Feasibility, business case and market analysis
- Procurement options analysis
- Project risk assessment
- Project governance and project management frameworks

— Commercial structuring of complex contracts
— Contract management
— Coordinating legal, financial and/or technical teams
— Procurement and process management
— Bid evaluation
— Project implementation advice through design and construction
— Project controls

Business Development

Support the senior management team with business development across the East Africa region in both public and private sector markets.

Practice Development

Train and mentor junior staff and contribute to the overall skills enhancement and experience of the team.

Skills & Qualifications

The ideal candidate has:

— Bachelor's degree in Finance, Accounting, Economics or Engineering (combined with a Masters preferred but not required)
— Project feasibility, structuring experience
— Project procurement experience through to financial close
— 8-10 years of experience in infrastructure consulting/industry
— Understanding the lifecycle activities of an infrastructure asset
— Experience with alterative contract types: EPC, PPP, etc
— Experience building project financial models
— Experience drafting business plans and feasibility studies
— Good interpersonal skills
— Excellent writing and analytics skills
— Proven capabilities of managing and working with a multi-disciplinary team.
— Demonstrated initiative and ability to communicate and effectively engage with a diverse group of clients
— Strong technical, analytical and problem-solving capabilities
— Proven track record at "juggling" multiple and competing priorities

If your career aspirations match this exciting opportunity, please forward your CV and covering letter to **talentrecruit@kpmg.co.ke** before **31 October 2020**
