

IT Advisory overview

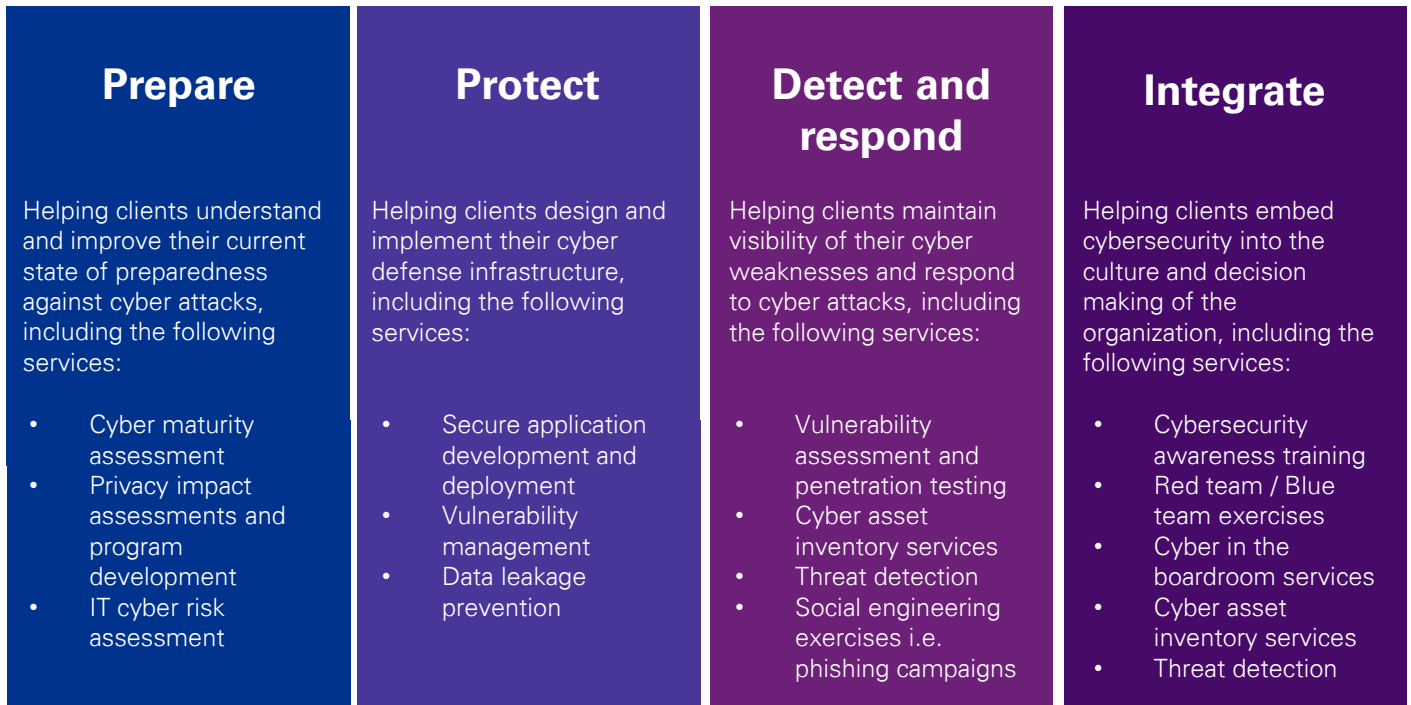

The constantly evolving threat landscape means that cyber risk is now an everyday business consideration. Cybersecurity is not a quick technical fix, nor is it a matter solely for the IT department.

KPMG in the Cayman Islands' IT Advisory team assists organizations in transforming their security, privacy and continuity controls into business-enabling platforms, while maintaining the confidentiality, integrity and availability of critical business functions. Our KPMG Cyber Approach strategically aligns with our clients' business priorities and compliance needs.

The KPMG Cyber Approach

The KPMG Cyber Approach is designed to be simple, effective and most importantly, tailored for our client's needs.

Our services are segmented and supported by specialized teams, providing clients with the right resources for any particular cybersecurity requirement. Below is a breakdown of service offerings and our approach to cyber security:

Joel Dodson
Partner,
Advisory
+1 (345) 815 2613
