

General Data Protection Regulation

Since 25 May 2018, the General Data Protection Regulation (GDPR) has been in force.

The GDPR affects organizations that deal with consumers and businesses in EU member states, and will transform the way that personal information is collected, stored, used, disclosed and disposed of.

While meeting regulatory obligations is a must, there is a danger of seeing the GDPR as a one-off, 'tick the box' activity, rather than a deliberate move towards a privacy-conscious culture, where transparency, citizens' rights and accountability become second nature to all employees.

GDPR is not a box-ticking exercise
