Which standards are mandatory for your financial year end?

How to read the chart

Find your financial year end on the timeline. Each standard shown is either effective for the first time or not yet effective but available for early adoption, depending on whether the line is solid or striped.

For example, if your financial year end is 30 June 2015, then the standards from *investment entities* to *annual improvements 2010–2012 and 2011–2013* are mandatory for the first time in your annual financial report covering 1 July 2014 to 30 June 2015. By contrast, if your financial year end is 31 December 2015, then only the *employee contributions* amendments and the *annual improvements 2010–2012 and 2011–2013* are mandatory for the first time; the others were mandatory in the previous annual financial statements.

Key

In this publication, the term 'standards' is used broadly to refer to new standards, and amendments to or interpretations of standards.

Although the standards define effective date in terms of annual periods *beginning* on or after a specified date, this publication states the effective date in terms of financial years *ending* on or after a specified date, to align the information with your financial year end. It also assumes a financial year of 12 months.
