

Environmental guidelines

It's in our hands

April 2016

KPMG is working towards a more sustainable future by understanding, managing and minimizing the impact of our business activities on the environment. We support environmental initiatives in the communities in which we operate and help KPMG people consider their impacts on the environment.

Minimizing our operational impact

KPMG in Canada is committed to minimizing our operational impact through targeted efforts to reduce our footprint.

Purchasing

Use KPMG's nation-wide purchasing power to support environmentally and socially responsible products and services.

Office space

Minimize the environmental footprint of our office space and enhance KPMG's competitiveness and efficiency through innovations in the way we work.

Resource use

Minimize KPMG's environmental footprint by reducing our consumption of resources, and maximizing the amount of waste diverted from a landfill.

Travel

Reduce the firm's negative environmental impacts associated with travel.

Greenhouse Gases

Measure, reduce and report greenhouse gas emissions in alignment with KPMG International's Global Green Initiative.

Sustaining success

The success of KPMG's environmental culture is based on the engagement of our people and the ongoing monitoring of our progress.

Engagement

Build an active culture of environmental awareness based on the meaningful engagement of our people.

Reporting

Ensure the successful implementation of KPMG's environmental goals through ongoing monitoring and reporting.

Enabling sustainability

Our reach as a professional services firm extends beyond our operations and our people. We have the ability to positively influence change by the work we do with our clients and our community partners.

Strategic relationships

Support organizations in our communities that are working to address environmental issues affecting the places where we work and live.

Thought Leadership

Enable our people and our clients to advance the way they contribute to a more sustainable future.
