

KPMG Integrated Tax Solutions (KITS)

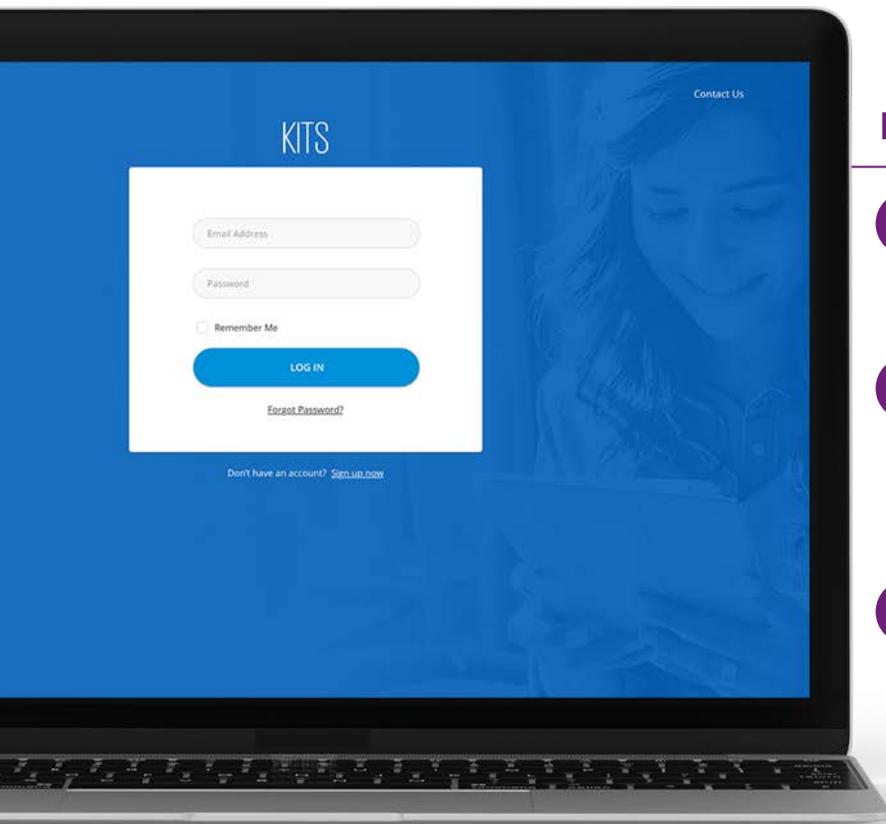

A less taxing way to prepare your taxes

KITS is KPMG's tax compliance solution for small and medium-sized companies. With a user-friendly interface and in-built tax logic, KITS provides the user with a hassle-free platform for the preparation of your company's annual tax return.

KITS provides:

- 1. Step-by-step guidance:**
Our tool will guide you each step of the way when preparing the tax computation.
- 2. Built-in tax logic:**
Our built-in tax logic, powered by KPMG's expertise, will recommend the appropriate tax treatment based on the data entries, so you don't have to worry about not knowing the tax rules. In any case, help is just a chat or phone call away.
- 3. Auto-generation of tax computation and Form C-S:**
Upon completion of the data input, KITS will automatically generate the tax computation and Form C-S, which companies can export and print for submission to IRAS.

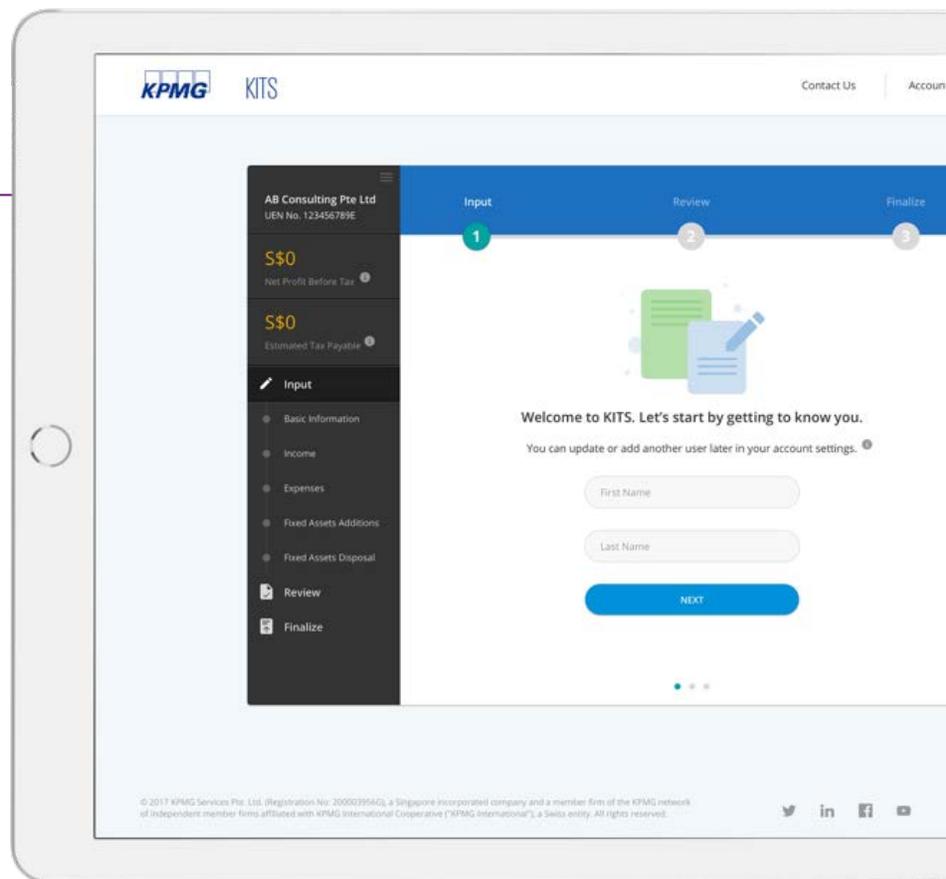

How it works

- 1 Tell us what's your Net Profit Before Tax**
Yes, that's all! We will only need this to kick-start your preparation.
- 2 Answer a few specific questions**
Tax preparation does not have to be time-consuming or difficult. Our simple questionnaire will guide you on the information needed and how to go about retrieving it.
- 3 Review your tax filing and computation**
We will give you a personalised, single view of your tax computation and returns, and provide additional information about the tax treatments before you proceed to submit your business' tax return for the year.

Focus on what really matters - your business

Finding it hard to keep up with the ever-changing corporate tax regulations? Leave that to us! Our platform is catered to non-tax professionals and business owners.

- 1 Questions and explanations are provided in simple English.
- 2 Links to IRAS resources to provide supplementary information.
- 3 Updated with the latest tax policies and available incentives to ensure accuracy.
