

Cyber Strategy & Governance

# Managed Cyber Governance

Cyber Serenity is  
having a clear plan  
to keep you safe  
in cyberspace

## Security for your business is our business

With KPMG Managed Cyber Governance, you get a clearly defined cyber-strategy for your business, as well as the support to implement it from top to bottom and beginning to end.

We begin by assessing your needs based on your risk appetite, sector and cyber maturity, before devising a strategy to keep you safe in cyberspace. From there, we deliver a clear plan and a roadmap that covers all the services to procure, processes to implement and people to either train or leverage to be truly secure. We will be there to manage the process at every step of your cyber journey – from identifying risks, protecting your assets and detecting threats, to ensuring that you are able to respond and recover afterwards.

### Phase 1

Cyber Maturity  
Assessment  
& Implementation  
Roadmap Development

### Phase 2

- Governance & Compliance Management
- Technical Security Assessment
- Training & Awareness

- 1 Security by design, from the very start**  
Efficient management of cyber risks by default, a clear cyber security roadmap, and baseline security controls across your organization – with KPMG Managed Cyber Governance, you can look forward to having all of these in place.
- 2 Strengthen the trust in your brand**  
Give your customers more assurance with robust data protection and governance in place, while elevating your brand reputation by aligning with international security standards, regulatory guidelines and compliance requirements.
- 3 Full support for your cyber journey**  
KPMG offers a wealth of experience in sectors and businesses, risks and regulations, as well as professional services. This translates to managed cyber governance that will not only secure your organization but also take into account specific business needs and priorities.
