**Remit-To Address:** Choose the Remit-To Address that you set up in your E-invoicing section in **Admin** for this invoice.

4. Complete line level information. Here you may edit the Quantity/Price if you are sending a partial invoice.

You can also add additional lines by clicking on Add Line or delete lines by clicking on the delete icon.

5. You will need to add Taxes by adding a VAT Rate for each line level item.

Please NOTE: it is important the VAT rate is an accurate determination of the line item description and invoice place of supply. This should be something that can be copied from your ERP system.

6. After adding **VAT Rate** for all the line level items click **Calculate**. This will then work out the new total.

Please **Note**: If applicable, all **Shipping Costs** should be communicated with the requestor upfront. The requestor will insert a line level item for the shipping cost on the PO. You can then flip that PO into an invoice with a line of shipping charge and complete the **VAT Rate** for the shipping to this line and invoice against it.

You should **NOT** add a new line for shipping cost while creating the invoice, as this will cause failure in the auto-matching of the PO and the invoice, putting your invoice on hold and delaying your payment.
