

Advancing the CIO agenda

- *Help CIOs lead the business in using technology to enable innovation and advance the business agenda*

The CIO Advisory practice provides key strategic advisory skills to ICT leaders for the effective strategizing, architecture, procurement, governance and mobilisation of transformational change to both business and IT.

The ICT leadership challenge is not to merely remain abreast of new innovation and disruption, but to fully embrace change as a means of gaining competitive advantage. The CIO Advisory team assist ICT leaders in navigating complex enterprise transformation, providing the required breadth and depth in leadership and practical experience across multiple industries, technological constructs and best practice approaches to achieve the desired short and long term benefits.

The services provided by the CIO Advisory practice include:

- Enterprise IT Transformation
- IT Strategy
- Enterprise & Solution Architecture
- IT Operating Model Design
- IT Procurement & Bid Management
- IT Governance
- IT Service Management
- Digital
- IT Deal Advisory
- IT Programme & Project Assurance
